

## HA20 PX

### Specifications

- **Working height:** 68ft (20.65m)
- **Platform height:** 61ft (18.65m)
- **Outreach:** 46ft (14m)
- **Safe working load:** 550lb (250kg)
- **Max outreach:** 22ft 3ins (6.8m)
- **Turret rotation:** 360 degrees
- **Outside turning radius:** 12ft 8ins (3.9m)
- **Unladen weight:** 27,027lb (12,260kg)
- **Transit height:** 8ft 9ins (2.67m)
- **Transit width:** 7ft 10ins (2.38m)
- **Transit length:** 29ft 6ins (9.0m)
- **Basket:** L: 0.8m W: 1.8m

### Features & Options

As well as a 360 degree turntable rotation, the HA 20 has a hydraulic platform rotation of 180 degrees. The compact dimensions make it ideal for transporting to site. Its fully proportional controls and simultaneous boom functions improve productivity.

4 wheel drive and 4 wheel steering

An AC power supply to the platform.

An electric (battery) emergency lowering system

Safe in winds up to 37mph

Towing hooks and lifting eyes

With a travel speed of 2.8mph the HA 20 is a robust, reliable machine that is easy to maintain. For rough terrain the hydraulic differential lock and 17ins (42cm) ground clearance improves its across terrain capability.
