Features & Options

The RTZ 210 has fold down hydraulic stabilisers to allow a quick setup. Its extremely short transit length along with its axle and chassis configuration allows for easy towing.

The Simon RTZ210 also features:

- Proportional electro-hydraulic controls
- LED warning system
- Emergency lowering system

Load management system that ensures the basket remains within a safe operating envelope at all times.

Safety features include lock valves on all hydraulic cylinders to protect against accidental hose burst, a reliable master-slave levelling system and a load management system that ensures the basket remains within a safe operating envelope at all times.
